

ALL SAINTS : LITTLE BOOKHAM

Client: - The PCC of All Saints Church, Little Bookham

Contract Value:- £300,000

The project involved the extension to this Grade 2* Listed church to provide a new meeting room, disabled toilet, kitchen and parish office facility. Michael Staff is the church's inspecting architect and the scheme was developed in response to the needs of the Parish and the desire to make historic churches such as these suitable for 21st century use.

The works comprised the removal of a Victorian vestry which was suffering from severe damp and subsidence and its replacement with a two storey extension.
